3. Construction work on this project, carried out by a firm called Construction Mavrovo, has been going on since June 1947. So far, however, only some tunnels and the road leading to the site of the plant have been started (see sketch). The project is considered a priority undertaking and is intended to supply current whenever there is a low water supply. The plant was originally intended to supply current to Macedonia, Albania and areas as far south as Greece, but the plan was subsequently changed to include only Macedonia.
4. As of June 1949 there were no military units stationed in Mavrovo. Nothing was heard regarding partisan activities in the Mavrovo area.
